Competitive Advantage**

- 
- ✓ *Improve productivity*
  - ✓ *Minimise lost time injuries*
  - ✓ *Reduce costs*
  - ✓ *Maximise safety*
  - ✓ *Enhance workplace relations*

# Muscle People Physiotherapy's EARLY INTERVENTION PROGRAMME

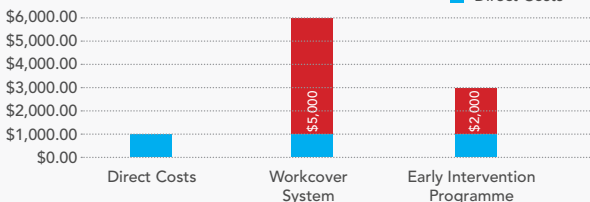

## :: Workplace injuries cost your business, money, time and people

The economic impact of workplace injuries is large. Statistics show that for every \$1000 in direct claim costs, employers pay an average of \$5000 in further indirect costs. This reduces profits, & injury claims also drain resources in many other ways including;

- significant consumption of administration time
- lower team morale reduces productivity
- recruitment costs
- human resource problems
- equipment and facilities issues

Muscle People Physiotherapy's Early Intervention Programme helps your business minimise the indirect costs of injury.

Total Claim Costs

## :: Six key business benefits of Muscle People Physiotherapy's Early Intervention Programme

### To eliminate or minimise;

1. lost time through injuries
2. economic impacts on your company
3. overall productivity losses

### To build and enhance;

4. positive workplace relations
5. administrative efficiency
6. a safer and more productive work environment

**Don't leave it to chance – Call Muscle People now.**

## :: Research proves there are some crucial elements for delivering optimal outcomes

---

- ✓ an early return to work
- ✓ structured communication involving all parties
- ✓ effective evidence-based management focussing on structured functional upgrading
- ✓ clearly communicated goals & timeframes
- ✓ regular review points to evaluate the programmes effectiveness in terms of economic, HR & productivity benefits

## :: Muscle People Physiotherapy's Early Intervention Programme helps you achieve your goals

---

Most employers have the following goals for workplace injury management;

- ✓ improve productivity
- ✓ minimise lost time injuries by using suitable duties
- ✓ reduce costs, including ACC insurance premiums
- ✓ maximise safety
- ✓ reduce risk of future problems
- ✓ enhance communication & workplace relations
- ✓ maximise administration efficiency
- ✓ ensure systems and providers meet stringent quality assurance standards

“

*There should be immediate treatment of the injury or illness in order to facilitate early management of the injury. Priority should be given to an early, safe return to suitable duties following injury or illness...*

Workcover NSW, Guidelines for workplace return to work programs, September 2010

”

If these match your goals then Muscle People Physiotherapy's Early Intervention Programme will help you achieve them. We help you exceed performance targets by making injury management fast, effective, economical & efficient.

## **:: Muscle People Physiotherapy's Early Intervention Programme saves your business money, time & resources**

---

It works alongside the normal ACC/Workcover system however it allows some workplace injuries to be managed rapidly without lodging a full ACC/ Workcover claim. This can significantly reduce the indirect costs associated with workplace injuries.

A senior member of our team will contact you soon to arrange a meeting to discuss how we can help your business exceed your performance targets for workplace injury management.
